

# D-Fence Server Transmission Audit Report S.T.A.R

## Email system auditing service

D-Fence S.T.A.R service audits the email system established for domains and warns about security threats. The configuration and right set up of an email server is one of the most important details in credible email relaying. Safe and reliable email relaying is vital competitive edge in business to business communication.

D-Fence S.T.A.R – service verifies and reports the following targets:

### Server and communication security

Email communication contains a number of potential security challenges. Is it possible to use the server as a spam relay? Can the traffic be spied on? Could web criminals hijack user names and passwords through out the network? Are there any other potential vulnerabilities in the system?

The service responds to these and many other questions. S.T.A.R. works for all email systems without requiring any special skills.

### Service benefits

- Finds and isolates security threats
- Ease the CIO's daily routines
- Ensures that system fulfills authority requirements
- Ongoing active monitoring

### D-Fence S.T.A.R.

The service audits clients email system monthly and provides a detailed audit report to CIO and IT department. This assures the ability of responsible parties to control the situation and react immediately to any threats occurring.

### Reveals deviations from the system

Service also points out a configuration changes or software upgrades arising from potential threats, or problems with addresses, errors, and deviations in the monthly reports.

This reports help the company and staff to prevent any threats to information security.

# Service description

## S.T.A.R. Service verify the email system and traffic set up and configuration.

### Auditing

The D-Fence system establishes each verifying domain to be audited. At the same time the DNS records are reviewed. Once all the necessary configuration are done, the service verifies the email server, it's settings and security information. Testing over 50 sections.

### Audit report

On the basis of the test data the D-Fence system produces an audit report. The report is easy to interpret and it gives the test results in addition to background information with a thorough explanation for each error, and therefore makes the repairing processes easy.

The audit report is generated by email each month. The IT department will be continuously informed without using any of their own resources.

### ISO 9001 Quality standard

All D-Fence services are certified by ISO 9001 QMS. It guarantees that all our activities and processes are carried out in compliance with the established quality standards.

### D-Fence

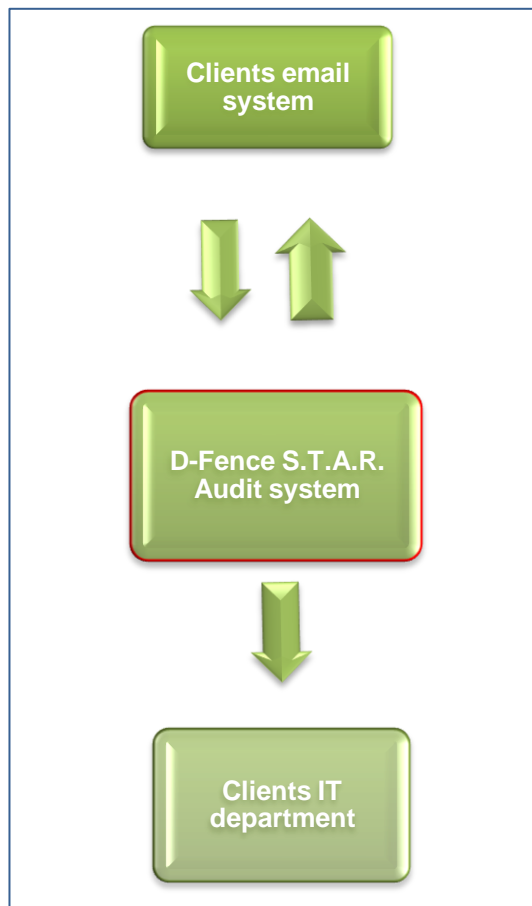

D-Fence is the leading managed email security provider in Northern Europe. The company was founded in 2000.

High quality recognized D-Fence services are sold globally via valued GlobeSec Partners.

D-Fence Oy, Kluuvikatu 1 F, 00100 Helsinki Finland. Tel + 358 9 623 14 18
